

XM Satellite Radio is the most dependable medium for news, traffic, weather and everything else that outdated and inferior AM or FM broadcasts make a pathetic effort to provide us with.

The National Association of Broadcasters should have no right to stifle a superior product in an effort to continue and promote their outdated inferior method of trying to informing people on the move.

I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I demand and deserve.
